

GRP Speech Pathology understands that being able to communicate is a basic human right that is essential for participation in every part of life. Having communication difficulties can have a profound impact on people's relationships, mental wellbeing and their ability to express their basic needs and wants in social conversation.

GRP speech pathology focuses on functional and highly evidence based therapy approaches that work on the premise of giving people with communication disorders the opportunity to participate, be independent and continue doing the things they have always loved to do.

GRP speech pathology treats people who experience difficulties with:

- Speaking
- Listening
- Understanding
- Reading
- Writing
- Social skills
- Stuttering
- Using voice

COMMUNICATION DISORDERS
